## Projects Involved in:

### ❖ PROJECT TITLE : Appointment Scheduling Application

**Client : Citizens Bank**

**Application : Q-Flow, ALM**

**Framework : PEGA**

**Platform : Windows 7**

**Role : Test Engineer**

**Brief summary:**

- Appointment scheduling application project involves in booking and managing the appointments of customers with the bankers.
- Customers can call to bank or contact centre agents and book an appointment with the required banker. Upon booking an appointment a confirmation mail/message will be sent to the customer.
- After booking the appointment he/she may want to reschedule the appointment as they can't get serviced on that day.
- Banker can cancel the appointments booked when it is no longer needed.

### ❖ PROJECT TITLE : ePost stability

**Client : RBS Citizens**

**Application : ePost, ALM, CMOD**

**Platform : Windows 7**

**Role : Tester**

**Duration : Dec-2014 to Apr-2015**

**Brief summary:**

- ePost stability project involves in creating and posting the transaction in web applications and also validating whether it is updated in Mainframe.
- The scope of the project is validating the monetary and memo details of the transactions in ePost and also in Mainframe.

- Transactions are approved by different level of approvers based on threshold amount. Deposits and Loan account transactions are treated individually based on tran codes and batch numbers.
- Reports are validated to ensure whether the transactions are balanced in both ePost and in Mainframe

#### **Undergone Responsibilities :**

- Involved in communicating with the business analysts and the teams involved for a better understanding of the client requirements and project functionalities.
- Involved in converting Manual Test Case into Automation Scripts.
- Gained knowledge on all the activities that the other involved teams carried out in perspective of meeting the requirements.
- Involved in Designing automation framework from the scratch.
- Experience in debugging and modification of existing scripts.
- Automated all End2End test cases using Web driver.
- Reviewing the Test reports and preparing Test summary reports
- Involved in test scripts review.
- Lead Scrum meetings regularly for the day to day updates from teams involved.

#### **Highlights :**

- Recognized as the best contributor for the automation framework building and Quality of the automated scripts.
- Developed 3 most useful tools using the Excel VBA scripting in reporting purpose of the functionality.
- Designed and Worked solely on Complex algorithms to structurize a data file to an excel format that deal with very large data of 20million accounts' details.
